

Class Terms Sheet

S324
Soc of Mental Illness
Summer 2010

Over the course of the semester, we will use a lot of terms. This sheet is intended to help you keep track of them. We won't cover them all in one class, so you should bring this with you to each class, or print out additional copies if you need them. I expect that this terms list, along with your themes list, will become an important review document for your exams and should help you prepare your paper.

Term

1	biology/biological
2	brain
